Torbole, 14th of October 2014

October/2014

***Premier Dragon* "Desert Eagle" finishes European testing program with a 2nd place at the Hans-Dietmar-Wagner-Cup in Torbole, Italy.**

The European testing program for the *Premier Dragon* prototype "Desert Eagle" ends in Torbole (Italy) with a 2nd place.

Team Premier tested the *Premier Dragon* prototype at various regattas on European waters throughout the past summer. Various boat settings, mast trims and sails were tested all with the goal to achieve maximum boat speed.

In Kiel, Medemblick and Cannes various boat setups were tested. "In Torbole our goal was not to test new boat settings, but to prove that our *Premier Dragon* can achieve good results" says Witzmann. "We succeeded at that! I am very happy with the past season. We managed to test the boats in various wind conditions and different sized fleets and we managed to get the boat faster after every race."

The boat is now being shipped back to Dubai where the fit out will be adjusted. In November the testing will continue on UAE waters. "We are convinced that we will have very fast boats for the coming season" says Witzmann.
